							35 %	

Neighborhood Description This is a popular central area between Palmer and Wasilla, so it has easy access to services and employment. Some people commute 45-60 minutes to Anchorage for employment. There are several schools in the area. Most homes are well maintained and major access roads are paved. Appeal is average or above, compared to other neighborhoods.

Market Conditions (including support for the above conclusions) Property values have been on the rise in the last few years, and many new subdivisions have been developed. Demand and supply are in balance. Upper value homes exist mostly on lake front or bluff view lots. Marketing time has been average. Small concessions are common.

Dimensions Unknown; no information provided Area 1.20 Acres Shape Irregular; mostly rectangular View Average

Specific Zoning Classification None; typical for the area. Zoning Description No Zoning

Analysis of prior sale or transfer history of the subject property and comparable sales No other prior sales for the Subject in the last 3 years or sales for the Comparables in the year previous to the dates of sale were found.

Summary of Sales Comparison Approach Site adjustments are based on actual sales of unimproved lots. Age/Condition combined and adjusted at 1% per year of effective age variance, based on the sales price minus the site value. Size adjusted at \$40/SF; and garages at \$20/SF. Amenities are considered for contributory value and are combined to a single adjustment. All Comps are sales of residences with an accessory unit or MIL apartment similar to the Subject. These accessory units are not altogether uncommon in the area however, few such sales occur in any given year. Due to limited sales of similar properties with accessory units in the Subject's neighborhood which is large and wide spread and low in population, research was extended further than six months. Distances to Comparables is not unusual in this part of Alaska. Comps 1, 2, and 4 were adjusted downward \$4,000 under "Energy Efficient Items" based on the Subject's lack of 5 star energy construction standards. Comp 4 was adjusted downward \$5,000 under "Heating/Cooling" based on it's more expensive and desirable in floor heating system.

Comments continue on Additional Comparables Page.

Indicated Value by Sales Comparison Approach \$ 310,000

Indicated Value by: Sales Comparison Approach \$ 310,000 Cost Approach (if developed) \$ 312,202 Income Approach (if developed) \$ N/A

Sales comparison approach is weighted most because it is based on actual market reaction. It is supported by the Cost Approach. Income Approach is unusable due to the lack of data regarding the sales of rented single family residences in which to establish a GRM.

This appraisal is made "as is", subject to completion per plans and specifications on the basis of a hypothetical condition that the improvements have been completed, subject to the following repairs or alterations on the basis of a hypothetical condition that the repairs or alterations have been completed, or subject to the following required inspection based on the extraordinary assumption that the condition or deficiency does not require alteration or repair:

Based on a complete visual inspection of the interior and exterior areas of the subject property, defined scope of work, statement of assumptions and limiting conditions, and appraiser's certification, my (our) opinion of the market value, as defined, of the real property that is the subject of this report is \$ 310,000 , as of March 12, 2007 , which is the date of inspection and the effective date of this appraisal.

Uniform Residential Appraisal Report

File # 07-306

Additional Comments on Condition:

The following is a list of minor unfinished items and the estimated cost to finish;

(1) main level walk in closet flooring	\$500.
(2) miscellaneous floor trim & transitions	\$250.
(3) miscellaneous door handles/knobs and hardware	\$250.
TOTAL estimated costs	\$1,000.

The following is a list of recent renovations and upgrades to the Subject which contribute to it's low effective age and amenities.

2004

Shed workshop and 2nd storage shed constructed

2005

Windows & doors replaced

Roof replaced

New sheetrock & insulation

Addition to front of house

New forced air furnace and peninsula gas fireplace installed

2006

3 car/780SF garage with attic storage was constructed

Rear deck was constructed

Front porch and entrance was constructed

Well pump and pressure tank/system was replaced

Most fixtures and lighting replaced

Exterior painted

Metal one piece gutters were installed

Cedar fence was installed with driveway gates

Corners were surveyed & marked for extensive clearing and gravel fill

Extensive retaining walls and landscaping installed

Paved driveway and parking pad installed

2007

New hardwood, laminate, and tile flooring installed in approx. 80% of the residence.

The Cost Approach has been developed by the Appraiser as an analysis to support their opinion of the property's market value. Use of this data, in whole or part, for other purposes is not intended by the Appraiser. Nothing set forth in the appraisal should be relied upon for the purpose of determining the amount or type of insurance coverage to be placed on the subject property. The Appraiser assumes no liability for and does not guarantee that any insurable value estimate inferred from this report will result in the subject property being fully insured for any loss that may be sustained. Furthermore, the cost approach may not be a reliable indication of replacement or reproduction cost for any date other than the effective date of this appraisal due to changing costs of labor and materials, building codes and governmental regulations and requirements.

COST APPROACH TO VALUE (not required by Fannie Mae)

Provide adequate information for the lender/client to replicate the below cost figures and calculations.

Support for the opinion of site value (summary of comparable land sales or other methods for estimating site value) Site value was estimated using sales of competing similar lots of equal utility in the Subject's Subdivision and neighborhood.

PROJECT INFORMATION FOR PUDs (if applicable)Is the developer/builder in control of the Homeowners' Association (HOA)? Yes No Unit type(s) Detached Attached

Provide the following information for PUDs ONLY if the developer/builder is in control of the HOA and the subject property is an attached dwelling unit.

Legal Name of Project

Total number of phases Total number of units Total number of units sold

Total number of units rented Total number of units for sale Data source(s)

Was the project created by the conversion of existing building(s) into a PUD? Yes No If Yes, date of conversion.Does the project contain any multi-dwelling units? Yes No Data SourceAre the units, common elements, and recreation facilities complete? Yes No If No, describe the status of completion.Are the common elements leased to or by the Homeowners' Association? Yes No If Yes, describe the rental terms and options.

Describe common elements and recreational facilities.

Uniform Residential Appraisal Report

File # 07-306

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the interior and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.

2. The appraiser has provided a sketch in this appraisal report to show the approximate dimensions of the improvements. The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size.

3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.

4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.

5. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing the appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.

6. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

Uniform Residential Appraisal Report

File # 07-306

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.
2. I performed a complete visual inspection of the interior and exterior areas of the subject property. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.
3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.
5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.
6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.
7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.
8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.
9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.
10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.
11. I have knowledge and experience in appraising this type of property in this market area.
12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.
14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.
15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.
16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.
17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.
18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).
19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.
20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

Uniform Residential Appraisal Report

File # 07-306

21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).

22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.

23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.

24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.

4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

SALES COMPARISON APPROACH

SALE HISTORY

ANALYSIS / COMMENTS

Report the results of the research and analysis of the prior sale or transfer history of the subject property and comparable sales (report additional prior sales on page 3).

ITEM	SUBJECT	COMPARABLE SALE # 4			COMPARABLE SALE # 5			COMPARABLE SALE # 6		
Date of Prior Sale/Transfer	No prior sale known or	No other sales found in year								
Price of Prior Sale/Transfer	disclosed in the last 3 years.	previous to date of sale								
Data Source(s)	State of Alaska Recorder's Office	Local MLS; MSB tax records								
Effective Date of Data Source(s)	Search date 3/15/2007	Search date 11/28/2006								

Analysis of prior sale or transfer history of the subject property and comparable sales No prior sales for the Subject in the last 3 years or sales for the Comparables in the year previous to the dates of sale were found.

Analysis/Comments All Comps were adjusted downward \$1,000. under "Condition" based on the Subject's minor unfinished items. These minor items do not have a negative impact to marketability or livability. (See page 3 of 6 for list and estimated costs).
 The Subject's low effective age is due to it's extensive renovation and 2 additions in the last few years (See page 3 of 6 for list of recent improvements).
 The lower area of the Subject and Comp 3 were combined with the upper area and adjusted as one adjustment. Buyers purchase homes based on the overall size and utility and not by above or below grade floor plan lay out.
 Comp 1 is a slightly larger new home similar in garage size, site, and amenities. Comp 1's site value is estimated at \$35,000.
 Comp 2 is a slightly smaller home with a smaller 2 car garage. Exact garage size data was unavailable and was estimated at the average 2 car/stall size. Comp 2's site value is estimated at \$40,000.
 Comp 3 is an older home with an older effective age as determined by the Appraiser. The site is larger but not much more valuable due to it's location further from the core area. Comp 3 is most similar in floor plan layout. Comp 3's site value is estimated at \$45,000.
 Comp 4 is superior in garage size and site size and view. Large net adjustments exceeding typical lending guidelines could not be avoided due to these large site and garage adjustments. Comp 4's site value is estimated at \$85,000.
 All sales are considered equally in the final analysis. Mid range is felt to be reasonable.

Marketing Trends:

Virtually all of the various segments of the residential housing market in the Mat-Su Borough are currently experiencing growth. The Municipality of Anchorage is a major employment center for residents of the Mat-Su Valley, and the more mature and fully developed Anchorage market has come to the point where a shortage of readily developed residential land exists. The result has been smaller lots and escalating price trends in the Anchorage residential lots.

Recent upgrades to the Glenn and Parks Highways have improved commuting conditions, resulting in many Anchorage residents willing to consider living in the Mat-Su Valley as a viable alternative. The average sales price of a home for the first six months of 2005 in the Mat-Su Valley was \$210,927, compared to \$277,530 in Anchorage for the same period, a difference of 32%.

According to the Alaska Department of Labor and Workforce Development, the average annual earnings of a Mat-Su worker in 2004 was \$31,012 compared to \$41,484 for the Anchorage worker. Based on the average wage and the average sales price of single family residences, the number of Mat-Su wage earners needed to buy a home in the Mat-Su Valley is 1.7 compared to 1.6 for the Anchorage area. However when the Mat-Su Valley resident works in Anchorage, the number drops to 1.2. Population in the Mat-Su Borough grew by 18% between 2000 and 2004 compared to 7% in Anchorage for the same period.

It is difficult to accurately compare residential building activity between the Mat-Su Valley and Anchorage, however the Mat-Su Borough assessor's office does collect data from various sources, which provides a rough estimate of new homes built in the Mat-Su Valley. According to Alaska Department of Labor and Workforce Development, nearly half of the new housing units built in the Anchorage/Mat-Su region in 2004, were built in the Mat-Su Borough even though the Anchorage workforce is nearly nine times larger than the Mat-Su Valley workforce. Based upon these and other economic indicators, state and labor economists anticipate continued growth for the Mat-Su Valley. With the average sale price of a single family residence in the Mat-Su Valley nearly doubling from 1996 to the first half of 2005, and considering the previously mentioned statistics, we anticipate that the trend for Matanuska-Susitna Valley housing market in the future will be for continued growth. Values are stable and continue to rise slowly. Sales have decreased approximately 20-25% in the first half of 2006 as compared to the same time in 2005. Increasing interest rates and fuel cost are responsible for slower sales.

Subject Comments:

The effective age is based on the appraiser's estimate, after comparison, of the Subject structures's appearance and functional utility with competitive new homes having utility similar to the Subject. There is no known functional or external obsolescence.

Sales Comparison Approach:

The Sales Comparison Approach To Value is based upon the theory of substitution which is defined by the Dictionary of Real Estate Appraisal Fourth Edition as follows:

Substitution:

"The appraisal principle that states that when several similar or commensurate commodities, goods, or services are available, the one with the lowest price will attract the greatest demand and widest distribution. This is the primary principle upon which the cost and sales comparison approaches are based."

In order for the sales comparison approach to give an indication of value that has a relatively high degree of confidence, the sales utilized must be truly comparable (similar) to the Subject. Only then can minor differences be adjusted in relation to the Subject. If the sales used in the Sales Comparison Approach are not truly comparable to the Subject, no adjustment can yield an indication of value with a high confidence level.

MLS and public records were searched to locate sales comparable to the Subject. All comparable sales included in this analysis are from the same area as the Subject and are considered similar to the Subject in terms of overall quality and appeal. The search for comparables was made considering the combination of Subject features which may include: effective age, size, site value, garage size and other Subject characteristics. When possible, all of the comparable sales were chosen from a one mile radius of Subject, were sold within six months of the date of valuation, and bracket the Subject. When comparable sales included in this analysis do not fall within these parameters, they were the most similar sales available at the time.

Comments on Sales Comparison:

Comparable Sales utilized in this report which are over one mile from the Subject are located in competing subdivisions. Adjustments for sales concessions paid by the seller are made, if necessary. Location, Site and View values were adjusted based upon the comparative values of the various parcels. Market extraction was used to determine the price/square foot of the Subject improvements.

Supplemental Addendum

File No. 07-306

Borrower/Client	David & Veronica Wilson						
Property Address	3505 N. Tern Court						
City	Palmer	County	Matanuska-Susitna	State	AK	Zip Code	99645
Lender	Alaska USA Federal Credit Union						

When appropriate, an age adjustment was made based on the differences in the effective ages of the improvements.

Other adjustments were made based on market extraction of information provided by local real estate professionals. Room count adjustments are based on the bath count only, \$1,500 for a half bath and \$3,000 for a full bath.

Additional Comments:

Be aware that the Appraiser is not qualified to perform a full building inspection. Recommended repairs are limited to those items that are "readily observable." This report is not construed to warrant in any way the structural soundness of the Subject. I AM NOT A QUALIFIED INSPECTOR. A home inspection report has not been provided and reviewed.

Any unknown repair or adverse conditions may negatively affect the estimated value. In this Appraisal assignment, the existence of potentially hazardous material used in the construction or maintenance of the building, such as the presence of urea formaldehyde foam insulation, and/or the existence of toxic waste or mold which may or may not be present on the property, was not observed by me; nor do I have any knowledge of the existence on or in the property such materials on the property, I am not qualified to detect such substances.

In homes utilizing an on-site well, it is assumed to be functional and adequate to provide sufficient potable water to the Subject. In homes utilizing a on-site septic systems, it is assumed to be functional. I am not an expert in the certification of such systems and an expert should be contacted if desired or required by the client.

Sales used in the comparison analysis are confirmed closed transactions unless noted. No deductions, discounts, or concessions affecting value were involved unless specifically indicated. Sale information is confirmed through sources such as Multiple Listing Service (MLS); real estate agents; lenders; or closing agents as noted in the report. The statistical data has been received from sources such as the appraiser's files, other appraisers, Mat-Su Borough records, real estate agents; or plans and specs as in the case of new construction. These sources are assumed reliable. On the comparable sale chart under "date of sale/time", the first date is the date the contract was agreed to, the second date is the date the sale closed.

CLARIFICATION OF SCOPE OF WORK: The purpose of the appraisal is to offer an opinion of market value for the subject property as defined herein. The intended use of this appraisal is to assist the lender/client(s) identified by the client(s) at the time of the original assignment and named in the report in evaluating the subject property as collateral for a mortgage lending decision only. The client as defined in the Uniform Standards of Professional Appraisal Practice is the party or parties that engaged the appraiser by contract in this specific assignment and is identified in this report as the only intended user(s). There are no other intended user and there are no other intended uses communicated by the client to the appraiser at the time of the assignment. However, there are those individuals or entities that may use or rely on a part of or entire appraisal report that were not identified as intended users by the client(s) and this report has not been prepared to address any specific needs of those individuals or entities. Questions or concerns a third party may have should be directed to the client(s) identified in this report and not the appraiser. The following steps were taken in arriving at the final opinion of market value:

- (1) After receiving the assignment, a preliminary search was made to determine market trends and other significant factors pertinent to the subject property.
- (2) A physical observation of the property was performed of the unobstructed, exposed surfaces of accessible exterior and interior areas of all structures without removal of personal possessions by the appraiser. Exterior photos were taken for the appraiser's work file with photos of significant items included in this report. Although due diligence was exercised while visiting the subject property, the appraiser is not an expert in such matters as identification of mold, lead based paint, pest control, structural engineering, hazardous waste, soil slippage, waste disposal system integrity, electrical-plumbing-roof-foundation systems, etc and the appraiser assumes no responsibility for those items. Mold may or may not be present in areas the appraiser could not readily observe. The presence of lead based paint and contamination cannot be ruled out based on subject age. If the client has any questions regarding these items, it is the client's responsibility to order the appropriate inspections with the final opinion of market of value being subject to a licensed professional's findings.

Intended Users - The Intended Use of this appraisal and appraisal report are as stated in the report form as follows: "The intended users of this appraisal report are the lender/client and fannie mae". No other intended users have been identified to the Appraiser and none are assumed. Pursuant to USPAP SR1-2.a, this appraisal is developed strictly and solely in accordance with those intended uses communicated to the Appraiser at the time of engagement. Failure by the lender to accurately identify all other intended users and their respective intended uses will result in those parties being excluded from authorization in using the appraisal in any way and for any purpose. Any party engaging in an unauthorized use should refrain from doing so and are advised to seek a separate appraisal developed specifically for their own uses. The appraiser neither recognizes nor accepts liability for unauthorized uses.

Use of this appraisal and appraisal report by other users is not intended by the appraiser. Unless otherwise identified by the Client as being an Intended User, all other third parties are considered to be unintended users, including but not limited to the current owner of the subject property, the borrower in the pending loan transaction, other mortgage lending institutions and other governmental agencies not involved in the mortgage lending process. Specifically, any potential buyers or outside lenders contemplating purchase or mortgage activity on this property are urged to seek a separate opinion of value from a competent and duly licensed/certified appraiser. Any additional requests in this

Supplemental Addendum

File No. 07-306

Borrower/Client	David & Veronica Wilson				
Property Address	3505 N. Tern Court				
City	Palmer	County	Matanuska-Susitna	State	AK Zip Code 99645
Lender	Alaska USA Federal Credit Union				

assignment by third parties must be requested in writing and may either be declined or if performed may be subject to additional billing to recover the costs associated with such requests.

Intended Use - The Intended Use of this appraisal and appraisal report as stated in the report form is "for the lender/client to evaluate the property that is the subject of this appraisal for mortgage underwriting in accordance with fannie mae guidelines". No other intended uses have been communicated to the Appraiser and none are assumed.

Pursuant to USPAP SR1-2b, this appraisal is developed strictly and solely in accordance with those intended uses communicated to the Appraiser at the time of engagement. Please note that only a primary lending institution can make a decision with respect to a mortgage finance transaction. If a third party to this appraiser-client relationship desires an appraisal for their own uses, they are urged to seek one developed specifically for their uses from a competent and appropriately licensed/certified appraiser. The Appraiser in this assignment cannot accept responsibility for uses not otherwise identified at the time of engagement. Use of this appraisal report for other purposes is therefore not intended by the appraiser.

Use: Reading the appraisal report or possessing the report does not constitute use. Relying on the appraisal report to understand how the appraiser developed the opinion of value does not constitute use. The fannie mae report form states that the borrower and other 3rd parties may rely upon this report for a mortgage financing transaction only. In the opinion of the appraiser and the Appraisal Standards Board, this language is insufficient to clearly make a distinction between an intended user and those that may rely on the appraisal. Therefore, clarification is necessary.

The purpose of the Appraiser's clarification of the Intended Users and Intended Use is to establish specific expectations for this work-product in compliance with USPAP, as opposed to the additional undisclosed and/or unknowable expectations as are omitted in the report form. Any criticism of this apparent contradiction should be directed to the weaknesses of the language used in the form, which is considered a vehicle for communicating the results of an appraisal developed and reported by an Appraiser.
